Human Platelet Lysate

Human Platelet Lysate (HPL) is a non-animal derived cell culture growth supplement obtained from blood platelets after freezing and thawing. HPL contains abundant growth factors and cytokines necessary for cell growth and proliferation. Platelet lysate can be used as a source of growth factors to replace bovine serum in cell culture medium. Choose between our concentrated SER-HPL and our Ready-to-Use SER-HPL-GROPRO that has been formulated to use at traditional FBS ratios.

Human Platelet Lysate, Frozen, Concentrated , includes vial of heparin	100ml	SER-HPL-10MLSAMPLE	FREE
Human Platelet Lysate Frozen, Ready-to-Use	100ml	SER-HPL-GROPRO-SAMPLE	FREE
